

POSTDOCTORAL POSITION IN **DRUG ABUSE RESEARCH**

The University of Vermont announces the availability of a NIDA post-doctoral research fellowship position in an internationally recognized center of excellence for the study of drug abuse. The Human Behavioral Pharmacology Laboratory (HBPL), established in 1986, is a research unit of the Department of Psychiatry that studies environmental and pharmacological factors that influence drug abuse and diverse new treatments for drug abuse. Our research includes both treatment-outcome research on alcohol, cocaine, marijuana, nicotine, and opiate dependence and human laboratory research on the behavioral and biological effects of abused drugs. Fellows have opportunities for training in a wide range of treatment-outcome and human laboratory research.

Mentors: Current openings are with **Stacey Sigmon** and **Stephen Higgins** on lab studies related to psychomotor stimulants and clinical trials related to behavioral treatments for cocaine dependence and cigarette smoking.

Appointment: The training period is 2 to 3 years.

Eligibility: Applicants must have completed doctoral training in psychology, behavior analysis, or a related discipline and be U.S. citizens or permanent residents. Trainees are selected on the basis of scholastic record and commitment to drug-abuse research.

Salary: Competitive commensurate with experience (PGY 1 to PGY 7) and supported by an NIDA/NIH Institutional Training Award.

To apply: Please forward a curriculum vitae, statement of research interests, and three letters of reference in c/o:

Ms. Diana Cain
University of Vermont, Dept. of Psychiatry
1 South Prospect St. UHC - MS#482
Burlington, VT 05401

Email: Diana.Cain@uvm.edu

For more details on the position please contact the investigators directly at the e-mail addresses/phone #s shown above.
